

# Additional Help and Resources

## R and RStudio Helpful Resources

- [Download: R from CRAN](#)
  - This is where you can download the R language software for FREE for your own computer.
  - Choose your operating system (Mac OS or Windows or Linux/Unix)
  - NOTE: For Windows, you should also download and install [Rtools](#) - this is technically optional, but is useful to have. Make sure to download the one for your R version.
- [Download: RStudio IDE Desktop](#)
  - Note: Windows is listed at the top - just scroll down to see the installer for the Mac OS as well. There are also installers for the versions of Linux/Unix.
- [RStudio Education](#)
- [RStudio Cloud Tutorials](#)
- [\\*\\* Quick-R \\*\\*](#)
- [Rmarkdown Tutorial](#)
- [tidyverse](#)

## Other Helpful Websites

- [Datacamp](#)
- [R for SAS Users - My Datacamp Course](#)
- [Coursera](#)
- [Reproducible Templates for Analysis and Dissemination - My Coursera Course](#)
- [Emory N741](#)
- [Emory N736](#)

## Helpful Online Books

- [Book: Statistical Inference via Data Science](#)
- [Book: The Epidemiologist R Handbook](#)
- [Book/Course: Stat 545](#)

## Other places to get HELP

- [StackOverflow](#)
  - I encourage you to create an account so you can post questions. But even without an account you can search for and find answers to your questions and error messages.
- [Google](#)
  - You can often cut and paste error messages in Google to find answers - most likely will redirect you to Stack Overflow.
- Package vignettes for packages on CRAN
  - Here is [one vignette for dplyr](#)
  - These will often help you get started.
- Github package issues
  - Many packages will host their code on Github which includes an “issues” tab. This can be a good place to see what other problems people may be having with a given package.
  - [dplyr issues on Github](#)
- CRAN package site
  - [dplyr on CRAN](#) - spend time looking at:
    - \* the [README](#) for the package or
    - \* [bug reports](#) or
    - \* [NEWS](#) which will detail the changes for each version updates
- [R Bloggers](#)
  - This is a really good website which curates thousands of people who are R developers, users and programmers who post articles about R.
